Reservoir Beach & North Union Spray Park Notice -

We're not ready yet - but we will be soon!

With super hot temperatures predicted this weekend, please be aware that, unfortunately, Reservoir Beach will not open until June 18th. Reservoir Beach Park is currently under construction with multiple construction vehicles and equipment on site. The water filtration system is NOT on and the water quality has NOT been tested. For your own safety and health, please do not swim in the reservoir or visit the playground until we are officially open.

The Thompson/North Union Spray Park is currently not operational. This facility is typically opened around the last day of school in June. The opening process is not as simple as "turning on a switch" and requires care to ensure that the system is properly running for the entire season. While we expect it to be hot this weekend, a little over a week ago we had temperatures below freezing at night. Turning on the system too early can cause problems later on in the season.

Thank you for your continued support and patience!
